Editorial policy

Redia is concerned with research in the field of agricultural, forest and urban zoology, predominantly dealing with entomology, acarology and nematology. Particularly welcome are fundamental studies concerning taxonomy and biology of crop pests and their natural enemies in agricultural and forest environments, as well as applied researches on methods of preventing and controlling their infestations.

The Publisher's Policy is to use acid-free permanent paper.

INDEX OF THE VOLUME 107 OF “REDIA”

- EL KHOURY Y., SALVEMINI C., TARASCO E., CRINGOLI G. - New extraction method of entomopathogenic nematodes using the basic FLOTAC and the Mini-FLOTAC techniques. 3
